Role: Front-End Developer

Software development company that placed me as a developer at the Minas Gerais State Treasury Department.

- Development of the electronic invoice system for the tax authorities (the federal agency responsible for inspecting all and any person, both natural and legal, regarding taxes) focused on products in transit in Minas Gerais.
- Training two new programmers in React to be allocated to the project.
- Interviewing two new candidates for the front-end developer position.
- Project documentation to facilitate the integration of new developers.
- Architecting a project with over 400,000 electronic invoices issued per day.

- Technologies: Typescript, HTML, CSS, Next, Context API, jest, vistest, Git, Azure devops, Figma, React Hook Form, zod, storybook, material ui, styled components.

Swot Service Engenharia (Short period) – 11/2023 – 12/2023

Role: Front-End Developer

SWOT Service Engenharia is a Brazilian company specialized in engineering services, including projects, inspection, planning, budgeting and supervision of projects.

- Development from the initial stage to the completion of the company's main website (<https://www.engenhariaswot.com.br/>);
- Alignment with the customer to understand needs;
- SEO optimization to improve position on platforms and search engines;
- User Interface Development, creating layouts and visual components;
- Creation of design, platform visuals (prototypes) and solution design;
- Performance optimization focusing on loading time and experience;
- Participate in code reviews to ensure source code quality and consistency;
- Technologies: Typescript, HTML, CSS, Vue.js, Nuxt, Tailwind css, Git.

Service Net Tecnologia - 08/2022 - 02/2023

Role: Front-end Developer

Software company providing customized solutions to clients across multiple industries, including healthcare, finance, retail and education, ensuring high quality and customer satisfaction.

- Participation in large internal projects with different technical needs;
- Update and maintenance of web projects according to the client's needs;
- Planning and development of websites;
- Systems maintenance and bug fixing;
- Carrying out unit tests of ongoing projects;
- Technologies: Javascript, Typescript, HTML, CSS, React, Saas, Vue.js, React Hooks, Styled Components, Axios.

W3lcome|Place Hub - 02/2021 - 08/2022

Role: Full Stack Developer

W3lcome is an electronic reception and visitor management system. Trusted by major Brazilian brands such as SBT and Outback and many other customers in the country of Singapore. I worked on the dashboard, mobile application, totem and system API.

- Maintenance of dashboards and mobile applications (IOS and Android);
- Implementation of new features, including check-in flows and integration with Google Calendar;
- Technical reference for the team, providing support to the team related to technology;
- Automated tests on the backend to ensure quality;
- Technologies: SQL, NoSQL, Javascript, Typescript, HTML, CSS, Jest, Postgres, Nodejs, Express, React Native.

Brisa - 04/2018 - 02/2020
